

The Bristol Partnership Benefits to Neighborhood

The Bristol partnership improves the quality of life for the surrounding neighborhood by investing in a sound reduction barrier, limiting race dates, agreeing to strict curfews, increasing parking options, and committing to specific local partnerships.

More importantly, the Bristol partnership has the support of the local neighborhood residents who favor a future that will reduce auto track sounds and relieve current parking constraints.

Bristol believes that being a good neighbor is critical to the successful operation of the Nashville Fairgrounds Speedway and is working with local neighborhood organizations in partnership. For example, Bristol has partnered with several local organizations including:

- Glenclyff High School and Fall Hamilton Elementary School to invest resources into student success.
- Conexión Américas and its Casa Azafrán facility to support the Latino community around NFS.
- Operation Stand Down Tennessee to support military veterans and their families.
- The Boys and Girls Clubs of Middle Tennessee to provide educational access and activities for program participants.

The Bristol plan to restore the Fairgrounds Speedway will include the addition of hundreds of new parking spaces that could be used for soccer games, flea market days, and special events.

Another way the Bristol Partnership will improve the quality of life is with the installation of a sound reduction plan that will significantly reduce impact on the surrounding neighborhood by up to 50%.

Bristol will be hiring locally for hundreds of well-paying full-time and part-time jobs for individuals working in ticket operations, facility maintenance, event logistics, guest relations and administrative roles.

The agreement approved by the Fair Board requires that Bristol limit motorsports events to ten weekends per year. Additionally, Bristol contractually obligated to reduce track rentals for practice dates to not more than 20 days per year. Motorsports events

will be limited to the hours between 3pm-9pm on school days; and noon to 10pm on weekends when school is not in session.
